Grading - Overview map 01

Affected Built-up and Transportations

Crisis Information	
Landslide	Highway, No visible damage
Built Up Grading	Main road, No visible damage
Destroyed	Local road, No visible damage
Damaged	Track, No visible damage
Possibly damaged	Bridge and elevated highway, No visible damage
Transportation Grading	Airfield and Heliport, No visible damage
Road, Destroyed	General Information
Road, Damaged	Area of Interest
Road, Possibly damaged	Not Analysed
Bridge, elevated highway, tunnel and subway, Destroyed	Hydrography
Bridge, elevated highway, tunnel and subway, Damaged	Lake, River
Bridge, elevated highway, tunnel and subway, Possibly damaged	Placenames
	Placename

Event: On the 26 August 2026, a flash flood reportedly triggered by a Glacial Lake Outburst Flood (GLOF) in Nepal has caused significant damage in Rasuwa District. There is a 7 m-deep water level recorded by monitoring stations. Copernicus EMS Rapid Mapping is requested to provide flood extent and damage assessment emergency mapping.

Data sources and analysis: Pre-event image: ESRI World Imagery © DigitalGlobe (acquired on 05/02/2026 at 00:00 UTC, resolution 1.1 m). Post-event image: Pléiades-1A/B © CNES (2026), distributed by Airbus DS (acquired on 31/08/2026 at 05:27 UTC, resolution 0.5 m)*. Pléiades Neo © CNES (2026), distributed by Airbus DS (acquired on 31/08/2026 at 05:01 UTC, resolution 0.3 m)*. These images are used as background image. All images are provided under COPERNICUS by the European Union and ESA, all rights reserved.

* Image(s) provided by the International Charter (call ID 1052), all rights reserved.

The thematic layer has been derived from post-event satellite image by means of visual interpretation.

Map produced by ITHACA released by e-GEOS on the 04/09/2026.

Data Access:
All data displayed on the map(s), as well as Land Use - Land Cover layer(s), are available in the Crisis Information Package and the Base Layer Package (for reference data). The table above is available in editable format in the Crisis Information Package. All products and data are also available for download on the portal.

Estimated Population:
Estimated population is based on Copernicus Global Human Settlement Layer (GHSL) dataset. Additional population datasets and analysis are available in the summary table.
