Event The 23 July 2025, two major wildfires are ongoing in Albania. One is located in the southern part of the country, near the village of Dukat, endangering populated areas. The second one is located in the northern part of the country, near the Lure Natural Park. Copernicus EMS Rapid Mapping is requested to provide wildfire initial rough estimation, wildfire extent monitoring and damage assessment emergency mapping.

Data sources and analysis: Pre-event image: Pléiades Neo © CNES (2023), distributed by Airbus DS (acquired on 15/10/2023 at 09:38 UTC, resolution 0.3 m). Post-event image: Pléiades-1A/B © CNES (2025), distributed by Airbus DS (acquired on 06/08/2025 at 09:30 UTC, resolution 2.0 m).

The thematic layer has been derived from post-event satellite image by means of visual interpretation. Due to dense smoke, the burnt area delineation is not complete.

The current burnt area cumulates all burnt area extents from previous post-event products.
