Event: Since 27th July the number of wildfires in Portugal has continued to increase, with 60 active incidents currently reported. Three of these fires have been burning for over 24 hours. Due to the persistence of the fires in Arouca, Ponte da Barca and Vila Real, EMS Copernicus activation is being requested. Copernicus EMS Rapid Mapping is requested to provide fire extent and monitoring.

Data sources and analysis: Pre-event image: Sentinel-2A/B (2025) (acquired on 27/07/2025 at 11:21 UTC, resolution 10 m).
Post-event image: SPOT6/7 © Airbus DS (2025), (acquired on 05/08/2025 at 10:50 UTC, resolution 6.0 m).

The thematic layer has been derived from post-event satellite image using a semi-automatic approach. Due to dense smoke, the burnt area delineation is not complete.
