Event: On the 20 July 2026 at 01:07 UTC, a wildfire is reported to have affected the municipality of Brieva, in the province of Segovia, Spain, while on the 22 July 2026 at 17:54 local time, a wildfire started in the municipality of Almorox, in the province of Toledo, and spread to the municipality of Villa del Prado, in the Community of Madrid, Spain.

The events are on-going, with damage reported to affect forestry, protected natural areas, infrastructure, road networks, power supply and water supply, while evacuations have also taken place.

Copernicus EMS Rapid Mapping is requested to provide initial rough estimation, wildfire extent and damage assessment emergency mapping.

Data sources and analysis: Pre-event image: Sentinel-2 (2026) (acquired on 16/07/2026 at 11:06 UTC, resolution 10.0 m).
Post-event image: SPOT16/7 © Airbus DS (2026), distributed by Airbus DS (acquired on 25/07/2026 at 10:28 UTC, resolution 1.5 m).
All images are provided under COPERNICUS by the European Union and ESA, all rights reserved.

The thematic layer has been derived from post-event satellite image using a semi-automatic approach.

The current burnt area cumulates all burnt area extents from previous post-event products.

Due to dense smoke, the burnt area delineation is not complete.

	Current	Forecast	
	Jul 25, 10:28 UTC	Jul 26, 10:28 UTC	Jul 27, 10:28 UTC
Wind direction and speed	17 km/h	14 km/h	3 km/h
Temperature and relative Humidity	29° 27%	33° 16%	35° 18%

Data retrieved from ECMWF on Jul 25, 10:28 UTC. Calculated at: 40.34°N, -4.193°E.

Map produced by GMV released by SERTIT on the 26/07/2026.

Data Access:

All data displayed on the map(s), as well as Land Use - Land Cover layer(s), are available in the Crisis Information Package and the Base Layer Package (for reference data). The table above is available in editable format in the Crisis Information Package. All products and data are also available for download on the portal.

Estimated Population:

Estimated population is based on Copernicus Global Human Settlement Layer (GHSL) dataset. Additional population datasets and analysis are available in the summary table.
