Wildfire in Central Spain
PIEDRALAVES

Situation as of 05/08/2026 07:32 UTC
Grading - Overview map 01

Burnt area
19,335.3 ha

Potentially affected
population
~ 550

Built-up
930 No.

Crisis Information	Affected Land Use-Cover
Burnt Area	Arable land
Possibly damaged	Permanent crops
Local pipeline or line, Possibly damaged	Pastures
Possibly damaged	Heterogeneous agricultural areas
Transportation Grading	Forest
Highway, No visible damage	Shrub and/or herbaceous vegetation associations
Main road, No visible damage	Open spaces with little or no vegetation
Local road, No visible damage	Other
Track, No visible damage	General Information
Airfield runway, No visible damage	Area of Interest
Airfield and Heliport, No visible damage	Detail map

	Not Analysed
	Administrative Boundaries
	-- Region
	Hydrography
	Lake, River

Event: On the 20 July 2026 at 01:07 UTC, a wildfire is reported to have affected the municipality of Brieve, in the province of Segovia, Spain, while on the 22 July 2026 at 17:54 local time, a wildfire started in the municipality of Almorox, in the province of Toledo, and spread to the municipality of Villa del Prado, in the Community of Madrid, Spain. The events are on-going, with damage reported to affect forestry, protected natural areas, infrastructure, road networks, power supply and water supply, while evacuations have also taken place. Copernicus EMS Rapid Mapping is requested to provide initial rough estimation, wildfire extent and damage assessment emergency mapping.

Data sources and analysis: Pre-event image: SPOT6/7 © Airbus DS (2026), distributed by Airbus DS (acquired on 11/07/2026 at 10:35 UTC, resolution 1.5 m).
Post-event image: Legion © Vantor (2026), provided by European Space Imaging (acquired on 05/08/2026 at 07:32 UTC, resolution 2.0 m).
These images are used as background image.
All images are provided under COPERNICUS by the European Union and ESA, all rights reserved.

The thematic layer has been derived from post-event satellite image using semi-automatic approach and by means of visual interpretation.

Map produced by GAF Geospatial GmbH released by e-GEOS on the 05/08/2026.

Access to the portal

Data Access:

All data displayed on the map(s), as well as Land Use - Land Cover layer(s), are available in the Crisis Information Package and the Base Layer Package (for reference data).

The table above is available in editable format in the Crisis Information Package.

All products and data are also available for download on the portal.

Estimated Population:

Estimated population is based on Copernicus Global Human Settlement Layer (GHSL) dataset.

Additional population datasets and analysis are available in the summary table.
