TROPICAL CYCLONE CENTER / RSMC LA REUNION / METEO-FRANCE

BULLETIN FOR CYCLONIC ACTIVITY AND SIGNIFICANT TROPICAL WEATHER  
IN THE SOUTHWEST INDIAN OCEAN

DATE: 22/09/2025 AT 1200 UTC

PART 1: WARNING SUMMARY

Nil.

PART 2 : TROPICAL WEATHER DISCUSSION

The basin is in a winter pattern with weak to moderate convective activity in the trade winds' slowing-down area, especially in the extreme north-east of the basin..

The large-scale context remains unfavourable, with surface easterly wind anomalies related to the dry phase of the MJO and an Equatorial Rossby wave.

**Development of a tropical storm is not expected for the next 5 days.**

10-day outlook : Conditions expected to remain uncondusive for cyclogenesis.

*NOTA BENE: The likelihood is an estimate of the chance of genesis of a moderate tropical storm over the basin within the next five days:*

*Very low: less than 10%    Moderate: 30% to 60%    Very high: over 90%*

*Low: 10% to 30%            High: 60% to 90%*

*The Southwestern Indian ocean basin extends from the Equator to 40S and from the african coastlines to 90E.*
